A

Baby's

Skin

Is the most delicate of all delicate things, and is more subject to external influences than a grown person's.

The quality of the soap used in the baby's bath is of great importance, because it means a happy, healthy child or a fretful one, with skin full of irritation caused by the excessive alkali in the soap.

Curative-Skin Soap means much to the mother. It is as pure as it is possible to make a toilet soap. It will not cause skin blemishes, but possesses a soothing effect; it cleans but does not irritate. Try a cake. It is its own best advertisement. Made in America, too. Get it of
